PRESS RELEASE

Air Force Awards Trusted Computer Solutions \$2.1 Million Cross Domain Services Contract

Contract to Support Air Force's Cryptologic Systems Group at Lackland AFB

HERNDON, Va. – July 14, 2009 – [Trusted Computer Solutions \(TCS\)](#), a leading developer of cross domain and cyber security solutions, today announced that the company's Professional Services Team received a two year \$2.1 million contract to support the Air Force's Cryptologic Systems Group (CPSG), which provides highly-specialized security support for a wide-range of military and non-military agencies. Under the terms of the contract, TCS' Professional Services Team will provide the following:

- Establish and assist the CPSG's efforts to start a government sponsored management office and provide the framework and processes to support cross domain solutions.
- Create a lab environment to test and architect cross domain solutions.
- Facilitate collaboration and processes to support the Community of Interest (COI) for cross domain solutions.

TCS' SecureOffice® Trusted Gateway (TGS) product and other cross domain solutions will be used to assist CPSG with the secure transfer of sensitive and classified information between various networks. The TCS Professional Services Team will assist the CPSG Management Office in implementing TGS and taking it through the certification and accreditation (C&A) process.

SecureOffice Trusted Gateway is a cross domain solution that provides a rapid, multi-directional transfer of data between various security levels – unclassified, secret, secret releasable, top secret and sensitive compartmental information (SCI) networks.

"This is a very strategic win for our Professional Services Team," stated Ed Hammersla, Chief Operating Officer for TCS. "As the Management Office and government sponsor for

our TGS product, the Air Force will be taking the lead in managing the C&A process. In addition, this win supports our strategy to pursue services offerings in the management consulting area, including management office establishment, process support and managed services.”

About Trusted Computer Solutions, Inc.

Founded in 1994, Trusted Computer Solutions (TCS) is an industry leader in providing cross domain and cyber security solutions for both the private and public sectors. The Company’s portfolio of security products include the SecureOffice® Suite, a group of cross domain solutions that allow the secure transfer and sharing of information; Security Blanket™, an industry award-winning operating system lock-down and security management tool; and CounterStorm™, a behavioral, statistical and content-based anomaly detection system that rapidly identifies targeted and zero day attacks. All TCS solutions are backed by the company’s Professional Services group, which consists of nationally recognized experts in security policy, architecture, planning, and implementation. TCS is headquartered in Herndon, Va., with offices in Champaign, Ill. and San Antonio, TX. For more information, visit www.TrustedCS.com
